

AEUP CONNECTIONS

Looking Up & Beyond

The Absolute E-Z Up® Advantage

Absolute E-Z Up® was founded on one principle - finding a better way to serve the needs of customers in the access equipment industry.

We operate on a "Customer-Centered" business model that places a premium on long-term relationships and customer satisfaction well after the sale is completed. From seamless tech support and face-to-face training to a "no clutter" approach to sales and commitment to long-term follow up, *our organization is dedicated to making our customers' lives a little bit easier and work a little more fun!*

IAWP-9.6™ - Your Ideal Workplace Solution

The [IAWP-9.6™](#) is the ideal alternative to traditional, low-height 'lift' solutions such as ladders and scaffolding. Safety considerations were key in designing the IAWP-9.6, which offers safety features usually only found on larger machines.

With the smallest footprint in the industry at 26 in. wide and 47 in. long, and a zero inside turning radius, the IAWP-9.6 can easily maneuver in confined spaces, from small elevators, to narrow hallways, aisle ways, mezzanines and congested office spaces.

WE WISH YOU A
 VERY HAPPY NEW
 YEAR
 AND BEST
 WISHES FOR A
 PROSPEROUS
 2011.

At only 1,220 lb, the lightweight IAWP-9.6 has the lowest rolling tire floor load and unit weight in the industry and is able to climb grades to 35% and power through crush stone and gravel surfaces. The IAWP-9.6's unique design allows an unrestricted platform capacity of 397 lbs. with or without both decks extended. Powered by 2 TROJAN® 12-volt high amp batteries, the IAWP-9.6 can travel 5.5 miles and produce a duty cycle of over 250 lift cycles on one charge.

The revolutionary lifting system is a radical change in the lift structure in comparison to the design of competitive models. The IAWP-9.6 features an extruded aluminum alloy column that requires no maintenance. With this machine, there are no chains needing yearly inspection and no need to grease columns, resulting in a significant reduction in equipment maintenance costs and increased uptime.

Expand Your Product Line and Save Money - Special Financing Now Available

With our limited time [special financing](#), now is the ideal time to add our two most popular aerial work platforms, the IAWP-9.6™ and IAWP-15™, to your product line. We're offering 48, 54 and 60 month lease terms with payments as low as \$207.81 for the IAWP-9.6 and \$249.08 for the IAWP-15 (based on 60 month terms - please contact us for details). Special rates and pricing are available for orders over \$100,000. [Contact us](#) for more information.

AEUP Offers Industry-Leading Gold Standard Warranty

The most important aspect of any piece of equipment is safe, dependable up-time. If you're paying for repairs, you're not making money. At Absolute E-Z Up, our pledge to deliver the most reliable products available is backed by our unparalleled [Gold Standard 10-5-1 Warranty](#).

10 years on the mast assembly and cylinder
5 years on all other component parts
1 year on the batteries (not prorated)

For our customers, our Gold Standard Warranty means peace of mind and maximum return on investment. For us, it solidifies our commitment to deliver the most dependable and cost-effective equipment on the market.
