*Z213.700-2000 - Pedestrian electric trolley designed to transport tubes and rods having a maximum length of **4 meters / 13,12 feet**.*

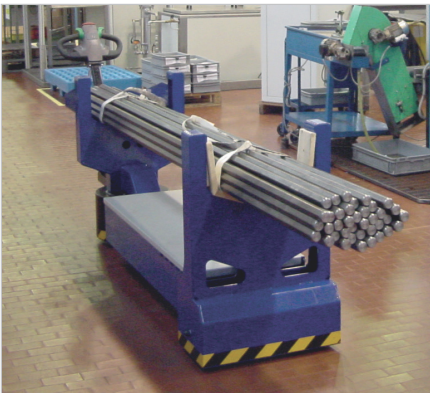

*Z213.700-3750 - Pedestrian electric trolley designed to transport tubes and rods having a maximum length of **6 meters / 19,68 feet**.*

Zallys M8 electric transporter has a maximum loading capacity of 3000 kg / 6613, 87 lbs and, thanks to the driving front wheel, it is extremely handy in tight spaces, allowing the operator to move the cargo to production lines with agility.

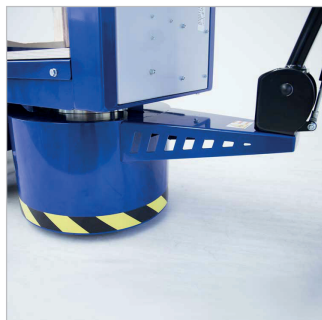

The electric trolley M8 is equipped as standard with acid batteries 240A that guarantee the use of the vehicle for at least two shifts.

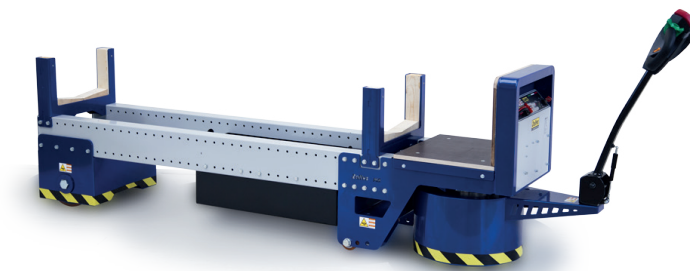

All Zallys products are manufactured with high quality material, guaranteed and CE certified according to European standards.
